

**Combinant (Combined Terminal Antwerp)** is an open access rail terminal for intermodal transportation, located in the port of Antwerp.

With its central location in the port of Antwerp and cooperation with different train operators, Combinant can offer extensive European rail network services.

**Combinant** was founded as a joint venture between BASF, Hupac and Hoyer with the support of Europe and the Flemish Government.

**Combinant** helps lowering the environmental impact by replacing a portion of road transportation with rail transportation.
